Results-oriented Web Developer with hands-on experience delivering responsive websites, enhancing existing platforms, and managing end-to-end web solutions. Recognized for problem-solving, adaptability, and consistently delivering solutions that improve user experience and support business objectives.

## EXPERIENCE

### Web Developer — Spenz Media

April 2026 – Current

- Developed and customized websites according to client requirements, implementing design updates, new features, and functionality enhancements.
- Created and maintained portfolio showcase websites/pages by replicating previously delivered client projects for the company's portfolio presentation.

### WordPress Developer — NSDA Technologies

Jan 2026 – Mar 2026

- Built and managed 5+ websites, including Mittify.com, while maintaining and updating Mittify.in and Chatorii.com.
- Integrated UPI payments, Google Search Console, and implemented various website functionalities and technical enhancements.
- Managed e-commerce operations, including product listings and technical support for marketplaces like Amazon and Flipkart.

## INTERNSHIP EXPERIENCE

### Web Developer — Bullaura Services Private Limited

May 2025 – August 2025

- Developed and launched the company's official website.
- Designed and implemented a custom CRM system. Integrated real-time location tracking and WhatsApp booking automation, streamlining customer bookings and admin communication.

## PROJECTS

### CRM Site

- Built a role-based CRM web application using PHP, MySQL, HTML, CSS, and JavaScript with secure authentication and separate dashboards for employees, coordinators, and admins.
- Implemented features including attendance tracking, task management, salary calculation, and real-time login monitoring.
- Developed media management functionality for photo and video uploads to support reporting and workflow documentation.

### Code Duels — Real-time Competitive Coding Platform

- Developed a real-time 1v1 competitive coding platform where users can challenge each other to timed coding battles and wager earned points.
- Implemented Practice Mode with difficulty-based problem sets and a point-based reward system, along with Duel Mode featuring random problem selection, live competition, and winner-takes-all scoring.
- Designed an engaging gamified experience by integrating user authentication, point management, and competitive leaderboards to encourage continuous learning and participation.

## LIVE WEBSITES

### BuildInspect — Business Website | Buildinspectmelbourne.com.au

- Developed a professional, responsive WordPress website with service-focused pages.
- Structured the website for clear navigation, mobile responsiveness, and improved customer conversion.

### Libertyfarm — Hospitality Website | libertyfarmsalaska.com

- Developed a responsive farm website featuring accommodation, dining, farm activities, gallery, and booking functionality.
- Created engaging content sections and integrated external booking/contact functionality for customer inquiries.

### Mittify — E-Commerce Website | Mittify.com

- Developed a WooCommerce e-commerce website with payment gateway, product management, country-based pricing/currency switching, cart and checkout functionality.
- Managed responsive UI, product listings, content updates, and ongoing website enhancements.
